

Content Creation for Startups

Welcome & The Startup Reality Check

Forget everything you know about enterprise marketing. As a startup founder, you don't have the luxury of massive budgets or dedicated content teams. That's why we embrace Minimum Viable Content (MVC) – the smartest path to growth.

THE PARADIGM SHIFT

Enterprise marketing vs startup content. Big brands play volume games – you play precision. Focus beats frequency every single time.

DEFINING MVC

Minimum Viable Content: the smallest content effort that delivers maximum learning and traction. Quality over quantity, always.

WHY MVC MATTERS

Early-stage founders need sustainable strategies that build momentum without burnout.

Finding Your Core Narrative

Use the "Who, Where, and What" Discovery Matrix to find your content sweet spot—the intersection of your expertise, your audience's pain, and the right platform.

01

ICP DEFINITION: IDENTIFY YOUR IDEAL CUSTOMER PROFILE—WHO NEEDS YOUR SOLUTION MOST

02

PLATFORM SELECTION: CHOOSE NATIVE CHANNELS WHERE YOUR AUDIENCE ALREADY ENGAGES

03

PAIN-POINT ANCHOR:
ADDRESS COSTLY MARKET PROBLEMS

Case Studies in Core Narrative

These two startup examples demonstrate how focused MVC narratives drive content relevance and audience engagement. By identifying their core expertise, target platform, and specific pain point, each brand created content that resonates deeply with their ideal customers.

Key Takeaway: A narrow, well-defined narrative beats broad, generic content every time. Focus wins.

B2B FINTECH × LINKEDIN

A B2B FinTech startup targeting CFOs struggling with regulatory compliance. They chose LinkedIn as their native platform and created educational content around compliance pain points, positioning themselves as trusted advisors.

D2C WELLNESS × INSTAGRAM

A D2C wellness brand helping busy professionals manage stress. They leveraged Instagram's visual format to share calming routines and behind-the-scenes authenticity.

The Content Pillar Framework

Content pillars are the foundational themes that anchor all your messaging and keep your brand consistent.

01

AUTHORITY / EDUCATIONAL

Build trust through tutorials, insights, and solving micro-problems

02

EMPATHY / BEHIND-THE-SCENES

Humanize your brand with founder stories and team journeys

03

SOCIAL PROOF / CONVERSION

Drive action with testimonials, case studies, and wins

Authority / Educational Pillar

Build trust by solving micro-problems for free. This pillar positions your startup as the go-to expert in your niche. Create tutorials, how-tos, and industry insights that deliver immediate value. When you consistently help your audience overcome small challenges, you earn credibility that converts to customers. Authority content drives organic growth because people share what genuinely helps them.

Empathy / Behind-the-Scenes Pillar

Humanizing your startup team and journey builds authentic connections with your audience. Share founder stories, day-in-the-life content, and the real challenges you face. This pillar creates emotional resonance that transforms followers into loyal advocates. Examples include team introductions, workspace tours, failure stories, and milestone celebrations. Authenticity beats perfection—your audience wants to see the real humans behind the brand.

Social Proof / Conversion Pillar

The third pillar focuses on demonstrating real results and customer success to build trust and encourage action. This includes testimonials from satisfied customers, detailed case studies showing measurable outcomes, and product wins that highlight your startup's impact. Social proof transforms skeptical prospects into confident buyers by showing evidence that others have succeeded with your solution. Data shows that 92% of consumers trust peer recommendations over advertising, making this pillar essential for conversion.

The Sustainable Workflow Myth & Methodology

Daily posting is unsustainable for startups. The truth? Quality batching beats quantity every time. Introduction to Batching: Create content in focused blocks, not scattered moments. The 3-Hour Weekly Routine: One dedicated session replaces chaotic daily scrambles. Why It Works: Preserves founder energy, maintains consistency, improves content quality.

The 3-Hour Batching Workflow

Master your weekly content creation in just 3 focused hours. This batching methodology maximizes efficiency while maintaining quality.

01

Hour 1: Brainstorm & Outline

Generate ideas, outline posts, map to content pillars

02

Hour 2: Deep Writing & Creation

Draft content in focused deep work sessions

03

Hour 3: Edit, Format & Schedule

Polish drafts, add visuals, queue for publishing

Day 1 Q&A & Homework Assignment

Before we wrap up Day 1, let's address your questions and set you up for success tomorrow. Your Homework: Draft your 3 core content pillars (Authority, Empathy, Social Proof). Brainstorm 1 post idea for each pillar. Come ready to share and iterate with peers on Day 2!
